Term

Spring

Out of this world

COMMUNITY

We will work co-operatively to find out about our universe.

OUR
DRIVERS

POSSIBILITIES

We will learn that it is possible to achieve the 'impossible'.

MINDFULNESS
& GROWTH

We will understand what it takes to achieve goals that others believe are not possible.

INITIATIVE

We will show curiosity about our solar system and ask thoughtful questions.

WOW!

We will begin our journey into space by exploring the planets in our solar system. We will become experts on another planet.

EXPERIENCE

We will take part in Science week and base all of our learning around the topic of Space and Forces. We will also have engineers coming in to support us with a project.

CREATE

We will create human models of the solar system to show how the planets move, and how day and night occur.

SMSC and British Values

Individual Liberty — We have the right to choose our own goals and aspire to reach new heights.

Respect — We will respect the ideas of others, and will respect the world that we live in.
